

Saba Al-Hazara

Company Profile

Blazing a Trail

Our Services

Our services including, but not limited to the followings:

1- Sourcing Supply:

- Mechanical
- Electrical
- Instrumentations
- PPE
- All types of pipes, pumps and valves

2- Chemical Supply:

- Production Chemical
- Drilling Chemical
- Refinery Chemical
- Sweetening Gas System Chemical

3- Waste Management:

- Waste Management Services
- Supply of Machinery and Equipment

4- Maintenance:

- Plant/refinery maintenance with any other maintenance requirements.

Saba Al-Hazara Company

Saba Al-Hazara Company for General Trading Ltd. is a privately owned company primarily operating in Iraq. Saba Al-Hazara deals with General Trading and Provision of Services along with Waste Management and Maintenance to Private Sector, Governments Sector and NGOs.

Saba Al-Hazara has the available experts and resources to deliver demanding standards of excellence. Saba Al-Hazara is structured to provide total support through teamwork and innovative supply chain management. Each division has committed workforce with necessary multi-disciplinary skills and experience to understand the client's requirement and to create value-added solutions.

Saba Al-Hazara has a strongly committed team which includes highly qualified and experienced engineers, creative design professionals and skilled support staff which enables us to serve the client at its best. The Management of Saba Al-Hazara is highly experienced in the industrial field including Operation, Maintenance, Refineries, Project Planning, Mobilization and Execution of Projects. We focus on achieving constant improvement in the field, continuous relationship with the clients and up-to-date knowledge of the market.

Vision

To be the best customer centric company through:

- 1- Operational excellence.
- 2- Best price.
- 3- Quick delivery.
- 4- Vast service provision.

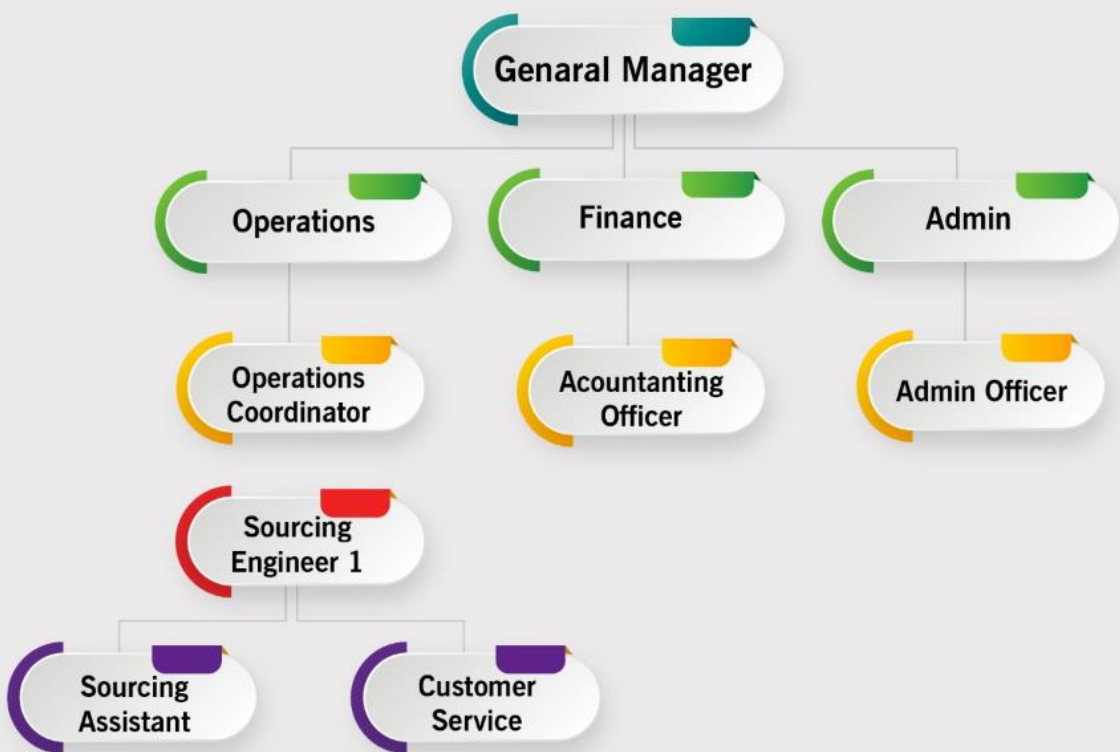

Core Values

Core Values to govern day to day business:

- 1- Integrity
- 2- Respect
- 3- Customer Focus
- 4- Operational Excellence
- 5- Teamwork

Organizational Chart

Chemical Supply

Product line includes an extensive suite of specialty oilfield production chemicals to treat a wide variety of oil and gas production problems encountered by our customers.

We take meticulous care to ensure the chemistry and application of each product is tailored to the specific crude and water characteristics of each customer's produced fluids by our experienced team of production chemists. As such our products typically outperform our competitor's products on cost performance thus reducing overall OPEX expenditure to our customers.

Drilling Chemical Supply

- 1- Alkalinity control
 - Castic Soda
 - Soda Ash
 - Citric Acid
- 2- Vicosifier
 - Xanthan gum
- 3- Deformer
 - A- Silicon base
 - B- Alcohol base
- 4- Corrosion Inhibitor
 - Amine compound corrosion inhibitor
 - biocides inhibitor
 - oxygen scavenger
- 5- Lost circulation material
 - Calcium Carbonate (C)
 - Calcium Carbonate (M)
 - Calcium Carbonate (F)
 - Oyster Shell C
 - Oyster Shell M
 - Oyster Shell F
- 6- WEIGHTING AGENTS
 - Barite
 - Bentonite
 - Calcium carbonate
- 7- Salt
 - SODIUM CHLORIDE
 - Potassium chloride
 - Calcium chloride

Production Chemicals

- Demulsifiers Corrosion Inhibitors
- Wax Inhibitors Paraffin Inhibitors Antifoams
- Asphaltene Inhibitors
- Biocides
- Oxygen Scavengers Drag Reducers
- Scale Inhibitors
- H₂S Scavengers (Water)
- H₂S Scavengers (Oil)

Refinery Chemicals

- Neutralizing Amine Cooling Water
- H₂S Scavengers
- Filming Amine Boiler Treatments

Sweeting Gas System

- MDEA
- DEA
- DGA
- MEG TEG
- Defoamer

Our Chemical Services Include, but not Limited to

- We can deliver Chemical directly to Customer's site
- We can delivery the requested chemical from our storage warehouse
- We can deliver in 25,000L ISO tanks, 1000L IBC or 200L drums
- We can take back the empty tanks and drums free of charge
- We provide Chemical Services 24/7 with our specialist chemist team
- Laboratory Services in Iraq

Chemical Management Services (CMS)

Management of specialty chemicals in support of maximizing production in the process facility through the assurance of reliable provision of chemicals and optimal management of chemical logistics to avoid operational disruption.

Our scope of service also includes, but not limited to, the provision of technical support personnel, supports operations to maintain production, minimize HSE risks, reduce operational costs and add value to our client.

Valves and Pumps

Saba AL-Hazara company as its oil and gas scope of work has the ability to provide all types of valves and pumps

TYPES OF VALVES

Gate Valve

Globe Valve

Y- Globe Valve

Ball Valve

Plug Valve

Diaphragm Valve

Reducing Valve

Pinch Valve

Butterfly-valve

Swing Check Valve

Lift Check Valve

Safety Valve

Plunger Pump

Radial Piston Pump

Progressing Cavity Pump

Piston Pump

Gear Pump

Diaphragm Pump

Screw Pump

Peristaltic Pump

Root Type Pump

Radial Flow Pump

Axial Flow Pump

Regenerative Turbine Pump

Eductor Jet Pump

Centrifugal Pump

Valveless Pump

Electrical Items

Saba AL-Hazara company with the help of its electrical team is capable to provide its clients electrical needs.

Personal Protective Equipment (PPE)

Saba AL-Hazara company has access to the main brands of PPE with good price and good quality.

Instrumentations

Saba AL-Hazara company has instrument engineers and technicians to source and find various types of instrumentations globally to our clients.

Waste Management Services

Saba AL-Hazara Company has qualified technical team highly experienced, various of machineries and equipment's which will give ability to deal with different kind of waste (Hazardous and Non-Hazardous).

Hazard & Non-Hazardous Solid waste Management

The systematic administration of activities that provide for the collection, separation, storage, transportation, treatment, and disposal of hazardous and non-hazardous solid waste. This process ensures the safe handling of waste materials to minimize their impact on public health and the environment, adhering to regulatory requirements and promoting sustainable practices.

Hazardous & Non-Hazardous Liquid Waste Management

The systematic process of managing liquid waste, including its collection, storage, transportation, treatment, and disposal, to protect public health and the environment. Key methods include evaporation, which reduces waste volume by converting liquids to vapor, and sewage treatment, which processes non-hazardous waste to remove contaminants, making the water safe for discharge or reuse. Effective management ensures compliance with regulatory standards and promotes sustainability.

Contaminated Soil Treatment

The process of managing and remediating soil contaminated with hazardous substances through various methods to ensure environmental safety and compliance with regulations.

1. Stabilization/Pit Remediation: This involves mixing additives with the contaminated soil to immobilize hazardous substances, preventing their release into the environment. Pit remediation includes excavating contaminated soil from pits, treating it to stabilize contaminants, and ensuring safe disposal or reuse.

2. Thermal Treatment Process: This method uses high temperatures to destroy or remove organic contaminants from the soil. Techniques such as incineration, thermal desorption, and pyrolysis effectively break down hazardous compounds, making the soil safe for reuse or disposal.

Machineries & Equipment:

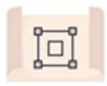

Saba Al-Hazara provides services and supplies using its own equipment to meet client demands efficiently. Our equipment is certified by third-party inspections and thoroughly checked by our competent staff before use. Our Machineries & Equipment includes: Hi-Ab cranes, flatbed trucks, vacuum trucks, incinerator, and different kind of skips, all operated by certified professionals.

Maintenance Services

Saba Al-Hazara has a dedicated team for general maintenance and the team will decide based on the maintenance need whether to repair, replace or restore it, we focus on the root cause in order to eliminate the source of this failure or reduce the frequency of it. The types of maintenance will be conducted based on the client needs whether preventative, corrective or scheduled maintenance.
